Supplier	Product Name	Product Type	Manufacturer's Product Description	Product Website
Cistermiser	Hydraulic Valve	Urinal flush control valve	Reduce water consumption and washroom odours <ul style="list-style-type: none"> Automatic urinal flush control. Unique hydraulic mechanism – no electrical supply or batteries required. Industry leader with half a million already installed. 'Fit and forget' quality and reliability. Hygiene flush option for periods of non-use. Ensures compliance with the Water Regulations. On DEFRA's ECA Water Technology List; purchase and installation are tax deductible. 	https://www.cistermiser.co.uk/product/hydraulic-control-valve
Cistermiser	Infrared Control (IRC®) Valve	Urinal flush control valve	Reduces water consumption by over 80% <ul style="list-style-type: none"> Normal or Economy mode options. Ensures compliance with the Water Regulations. Can be concealed to reduce the risk of vandalism. Battery or mains powered (no external transformer required). IRC® can use batteries as back-up power to mains supply if required. Front access to battery compartment for ease of replacement. Pipe, wall or ceiling mounted sensor: surface mounted or recessed. Visible LED status indicator and low battery alert. On DEFRA's Water Technology List; purchase and installation are tax deductible. 	https://www.cistermiser.co.uk/product/infrared-valve-with-pir-sensor
Cistermiser	Direct Flush Mains-flushing urinal valve	Urinal flush control valve	The cost effective solution to maximise urinal hygiene and water economy <ul style="list-style-type: none"> Designed for urinals flushing directly from the mains cold water supply. No cistern required. Only flushes urinal bowl after use. Vandal-resistant – valve totally concealed. Hygiene flush for periods of non-use. Adjustable flush duration and range. Discreet and Accessible fitting options. Mains and battery powered options included. Ensures compliance with Water Regulations. BREEAM Wat 01 compatible product. 	https://www.cistermiser.co.uk/product/direct-flush
Cistermiser	EVO 1.5"	WC flush valve	Easyflush EVO 1.5" Sensor WC Flush Valve	https://www.cistermiser.co.uk/product/easyflush-evo
Cistermiser	EVO 2"	WC flush valve	Easyflush EVO 2" Sensor WC Flush Valve	https://www.cistermiser.co.uk/product/easyflush-evo
Cistermiser	EVO CISTERN	WC Cistern	Easyflush EVO Cistern Sensor WC Kit - Cistern, Fill and Flush Valve	https://www.cistermiser.co.uk/product/easyflush-evo
Cistermiser	MSPV	Shower panel	Vecta+ Shower Panel	https://www.cistermiser.co.uk/product/vecta-plus-mechanical-shower-panel
Cistermiser	SSPV	Shower panel	Vecta+ Sensor Shower Panel	https://www.cistermiser.co.uk/product/vecta-plus-sensor-shower-panel
Cistermiser	DFA	Urinal flush valve	Direct Flush Accessible (with removable sensor plate) urinal flush valve per bowl	https://www.cistermiser.co.uk/product/direct-flush?attribute_fitting-type=Accessible&attribute_finish=Brush
Cistermiser	DFD	Urinal flush valve	Direct Flush Discreet (with discreet sensor) - urinal flush valve per bowl	https://www.cistermiser.co.uk/product/direct-flush?

Cistermiser	SZ/15	Water supply control	Sensazone water supply shut-off controller c/w sensor, fittings & 15mm valve	https://www.cistermiser.co.uk/product/sensazone
Groundbreaker	Groundbreaker	Smart metering	An insulated surface mounted water meter enclosure, offering by far the most efficient and practical solutions for smart water meters giving a "range" of transmissions of over 3 Km.	https://groundbreaker.co.uk/products/groundbreaker/
Groundbreaker	INSUDuct	Replacement piping	Used with or without Groundbreaker to protect water pipes outside the thermal envelope of a property, ideal for lead pipe or water service replacements - able to climb to multiple heights with up to three 32mm PE pipes.	https://groundbreaker.co.uk/products/insuduct/
Groundbreaker	SHalloDuct	Replacement piping	Insulation to protect water service from frost when laid horizontally at depths less than Water Industry recommended standards.	https://groundbreaker.co.uk/products/shallduct/
Groundbreaker	NRv2	Flow reducers	To be installed between a water meter and receiving manifold incorporating a CHECK Valve to remediate backflow issues from boundary boundary boxes.	https://groundbreaker.co.uk/products/nrv2/
Groundbreaker	LoFlo	Flow reducers	A water management system, as with NRv2 designed to be installed between a water meter and receiving manifold incorporating a check Valve AND Flow management facility. Designed to inconspicuously moderate flow rates to any standard water service to a pre-defined limit of 10, 12 or 14 litres a minute - proven to reduce per capita consumption by up to 12%.and therefore savings home energy usage and bills.	https://groundbreaker.co.uk/products/nrv2-loflo/
Groundbreaker	LoFlo Inline	Flow reducers	A fit and forget product, designed to be installed internally within a property above the stop cock, with the same water savings and backflow protection as LoFlo, just mounted inside a property - ideal for multi occupancy situations.	https://groundbreaker.co.uk/products/loflo-inline/
LeakSafe	WaterSwitch	Leak sensor	<p>Water shut off system to turn water off when the property is unoccupied and when a leak is detected. Install a Leaksafe WRAS approved motorised ball valve connected to a Valve Control on the incoming water mains, and a wireless On/Off switch by the main entry/exit point and turn the water off each time you leave the property. Turning off the water is as easy as turning off a light.</p> <p>Add another layer of protection by installing wireless transmitters and leak detection tape in areas where leaks are most likely – under kitchen and laundry appliances, under baths and showers and around water storage tanks. The tape will detect even a small drip from a pipe or connection and the transmitter sends a wireless signal to the Valve Control to close the valve on the incoming mains or water storage tank and sound an audible alarm.</p>	https://leaksafe.com/products/waterswitch/
LeakSafe	WaterComm	Leak sensor	<p>WaterComm is an Internet of Things 4-port leak detection and leak notification system that can be installed as a centrally located control panel with up to 4 leak detection zones wired away from it, or as individual units installed in risk areas with leak detection tape connected.</p> <p>Every port that is used is programmed with a location tag so that if a leak is detected the email or SMS notification gives precise date, time, and location information, so that no time is wasted in finding the cause.</p> <p>Included, is access to Leaksafe's Client dashboard that provides summary status information on all devices in a property or portfolio of properties, real time status of each individual device and optional weekly and/or monthly management reports.</p> <p>WaterComm can be used as a notification only system or connected to Leaksafe's WaterSwitch automatic water shut off</p>	https://leaksafe.com/products/watercomm/
LeakSafe	WaterTapp	Leak sensor	<p>WaterTapp components include a shut off valve, flow meter and control panel that monitors water flow in a property to determine if there is a leak when it will shut the water off and send an immediate notification via the system APP.</p> <p>WaterTapp allows you to turn your incoming water supply on and off in the APP that will also show you a daily water meter reading and whether your shut off valve is open or shut.</p> <p>There is an option to connect two leak detection tapes that will shut the valve if they are in contact with water.</p>	https://leaksafe.com/products/watertapp/

LeakSafe	WaterHub	Leak sensor	<p>WaterHub is a 6 zone, internet of things (IoT) leak detection system with shut off and notification that has been designed for installation in blocks of apartments during construction or during major refurbishment of a property. Cost of installation is optimised if incorporated into the construction programme.</p> <p>Leak detection tape can be positioned in up to 6 risk zones e.g., utility cupboards with boiler & washing machine, kitchen sink & dishwasher and bathrooms & WCs, and is cabled back to the WaterHub control panel that is connected to a WRAS approved shut off valve on the incoming supply. If any one of the tapes gets wet, a signal is generated that will shut the valve and at the same time generate a message giving the property name and exact location of the leak that is sent by either SMS and / or email to any number of designated responders.</p> <p>Messages are not dependant on WiFi but instead use either Sigfox LPWAN or Vodafone NBloT that provide a reliable and robust, low</p>	https://leaksafe.com/products/waterhub/
LeakSafe	xFlow	Leak sensor	<p>xFlow monitors the total water flow into a building or zone. It can identify leaks between the water provider's meter on the boundary and the meter installed where the water supply enters the property, and will monitor the flow within a building and automatically shut off the incoming mains supply if a leak is identified within the property itself.</p> <p>An integrated IoT module immediately notifies designated responders if a leak has been detected.</p> <p>xFlow is BREEM compliant and meets the Joint Code of Practice on the prevention and management of escape of water on</p>	https://leaksafe.com/products/xflow/
LeakSafe	HeatComm	Leak sensor	<p>HeatComm is a battery powered digital pressure gauge connected to a Leaksafe NBloT, Sigfox or WiFi* communications device designed to identify leaks on underfloor heating systems.</p> <p>If the gauge detects a drop in pressure on your underfloor heating system that indicates a leak, a relay is activated and the Leaksafe device generates a SMS, email alarm or push notification on the Leaksafe APP so that the pressure drop can be investigated and damage to the sub-floor minimised.</p> <p>HeatComm can also be used to monitor pressure on standard circulating heating systems.</p> <p>*subject to network or WiFi coverage</p>	https://leaksafe.com/products/heatcomm/
Ondo InsurTech	Leakbot	Leak sensor	<p>LeakBot's patented Thermi-Q technology accurately measures both the air and water temperatures in your home. If you have a leak it will continually draw colder water from outside into your home, creating a consistent drop in temperature. LeakBot can sense the prolonged and consistent drop in temperature and alerts you to the problem</p>	https://leakbot.io/leakbot/
Stormsaver	Combi System	Rainwater harvesting	<p>Designed to inconspicuously moderate flow rates to any standard water service to a pre-defined limit of 10, 12 or 14 litres a minute - proven to reduce per capita consumption by up to 12%.and therefore savings home energy usage and bills.</p>	https://www.stormsaver.com/water-reuse-products/rainwater-harvesting/commercial#:~:text=GET%20A%20QUOTE-,Combi%20Systems,
Stormsaver	Active Attenuation	Rainwater harvesting	<p>The Stormsaver Active Attenuation System is the smart way to manage stormwater. Active Attenuation integrates rainwater harvesting and stormwater attenuation into one solution. By combining the two technologies, it reduces the need for large and costly storage tanks.</p> <p>The system syncs with the Met Office to monitor weather forecasts, adjusting the level of stored water based on the predicted rainfall. This approach not only provides recycled rainwater for new commercial buildings but also ensures</p>	https://www.stormsaver.com/water-reuse-products/active-attenuation-
Stormsaver	StormStation	Rainwater harvesting	<p>The Stormsaver StormStation is a compact, modular rainwater harvesting system designed for new buildings, retrofit, and temporary solutions.</p> <p>The StormStation contains everything you need to achieve safe and compliant rainwater harvesting on your project including, pumps, filters, controls, and even an integrated plant room. The unit comes equipped with automated UV re-circulation as standard, enabling the continuous disinfection of rainwater in the unit. StormStation can even be supplied with solar panels, enabling a carbon neutral supply of rainwater for your building.</p>	https://www.stormsaver.com/water-reuse-products/rainwater-harvesting/commercial#:~:text=StormStation%20Systems

Stormsaver	Non-pressurised system	Rainwater harvesting	The Stormsaver Non-Pressurised System is an ideal water-saving solution for commercial buildings with high water usage. Designed with a break tank which is sized specifically for your requirement's, Non-Pressurised Systems are a highly reliable system type with multiple fail-safe functions to protect your facility from water supply disruption. Stormsaver Non-Pressurised Systems can be supplied with two types of control panels. The first is our standard control panel, the second is our unique Automatic Backwash Control Panel which offers an automated third stage of filtration, ensuring high levels of water quality. This compact unit includes system controls, a water meter, and triple auto backwashing filters to ensure clean, filtered water with a flow rate of up to 3 litres per second. It pumps water through a regulatory-compliant air gap to a custom-sized header tank, which can be gravity-fed or boosted to various building points. Additionally, the system seamlessly switches to mains water during low rainfall or power interruptions, ensuring uninterrupted water supply and	https://www.stormsaver.com/water-reuse-products/rainwater-harvesting/commercial#:~:text=Non%20Pressurised%20Systems
Stormsaver	Greywater Recycling	Greywater recycling	The Stormsaver Greywater Recycling System provides recycled greywater that can be used for various non-drinking purposes, including toilet flushing, irrigation, and vehicle washing. This system collects reclaimed water from showers, baths, and hand basins, allowing buildings to conserve water and contribute to sustainability efforts. Greywater Recycling is ideal for commercial buildings that consume a lot of water. It is especially suitable for places like apartment complexes, student accommodation, hotels, office buildings, sports and leisure venues, and any building with a high occupancy rate. The system uses advanced technology to treat and clean the water. It features a bioreactor tank that utilises oxygen and special bacteria, combined with micro-filtration, to	https://www.stormsaver.com/water-reuse-products/greywater-recycling
Thomas Dudley	Quantum	Push Button Syphon	The Dudley Quantum is a ground-breaking all new Pushbutton Operated Leak-Free Syphonic Toilet Flush Valve. This state-of-the-art product represents a significant leap forward in toilet flushing technology, offering unparalleled efficiency, reliability, and water conservation.	https://www.thomasdudley.co.uk/tyde/products/quantum/
Thomas Dudley	Turbo Edge	Toilet Syphon	Dudley's Turbo Edge® leak free syphon is the world's most compact syphon, guaranteed to fit more places than any others, with absolutely no compromise on flush performance. Manufactured in the UK by Thomas Dudley, Turbo Edge® is guaranteed to fit into all types of lever-operated cistern currently available, offering plumbers, installers and designers a versatile, easy-to fit and easy-to-service solution even in the tightest spaces.	https://www.thomasdudley.co.uk/tyde/products/turbo-edge-adjustable-syphon/
Thomas Dudley	Universal Syphon Toilet Repair Kit	Repair Kit	Universal Syphon Toilet Repair Kit; the complete repair kit for lever operated toilet cisterns.	https://www.thomasdudley.co.uk/tyde/products/universal-syphon-toilet-repair-kit/
Thomas Dudley	Turbo 88	Toilet Syphon	The Dudley Turbo 88 Syphon is an ideal replacement for syphons in most low-level lever operated cisterns. Its 2-part design enables the syphon body to be simply removed from the cistern leaving the white downleg in position. Servicing can then be completed in under 5 minutes without having to disconnect the water supply and dismantle the cistern. The Turbo 88 is a WRAS approved, market leading flushing syphon that incorporates a patented Dudley Duoflush facility. This delivers a water-saving reduced flush when the cistern lever is depressed and held down. When the lever is depressed and released, the Turbo 88 Duoflush delivers a full flush that is as reliable as ever.	https://www.thomasdudley.co.uk/tyde/products/adjustable-turbo-88/
Thomas Dudley	Auto Syphon	Automatic Syphon	Automatic Syphons are WRAS approved and have been available for over 30 years. Known for their quality and reliability they are a favourite of many OEM's for use in their cisterns.	https://www.thomasdudley.co.uk/tyde/products/auto-syphons/
Thomas Dudley	Wave S3	Electronic Push Plate	The Wave™ S3 Intelligent Flush Actuator is a high-end flushing solution for commercial and domestic installations that demand a premium finish. In conjunction with a Dudley Niagara Pneumatic this intuitive, touch free flush actuator provides a full and a water saving reduced flush.	https://www.thomasdudley.co.uk/tyde/products/wave-s3-push-plate/
Thomas Dudley	Hydroflo Airgap	Inlet Valve	Designed for use as a replacement in most plastic and ceramic exposed and concealed cisterns. Compact delay fill models save water and support BREEAM by only allowing a cistern to start refilling once flushing is complete. The unique float arm makes it impossible for the float to become detached.	https://www.thomasdudley.co.uk/tyde/products/hydroflo-airgap-compact-float-valve/
Thomas Dudley	Dudley Beta+ Bottom Inlet	Float Valve	The Beta+ valves are made to fit virtually all float operated cisterns.	https://www.thomasdudley.co.uk/tyde/products/dudley-beta-bottom-inlet-9-part-3-float-valve/
Thomas Dudley	Vantage	Toilet Cistern	Thomas Dudley manufactures a market-leading range of high quality concealed cisterns. These are perfect for use in all domestic and commercial applications and can be used with confidence in fitted furniture or behind tiles and most partitioning materials. A vast range of pushbuttons, push plates, levers and touch-free electronic sensors is available to provide the perfect finishing touch to any project. The Vantage has been designed specifically for use in bathroom furniture. It is ideal for use behind tiles and partitioning and in most other concealed applications. Supports BREEAM, bespoke flush volumes available upon request.	https://www.thomasdudley.co.uk/tyde/products/dudley-vantage/

Thomas Dudley	Dudley Mirage	Concealed Auto Cistern	Exceptionally strong concealed toilet cistern perfect for use in modern concealed washrooms. Use in combination with Dudley Kinetic for full regulatory compliance	https://www.thomasdudley.co.uk/tyde/products/dudley-mirage-concealed-auto/
Thomas Dudley	Resan 4 Way Control System	4 Channel Control System	Introducing the NEW Dudley Resan® Washroom Control System with 4 channels, intended primarily to control a single washroom's water outlets for use in specialist custodial and healthcare applications. A complete washroom water management system that allows control of hot and cold taps, shower outlet and WC	https://www.dudleyresan.co.uk/products/washroom-control-system/
Thomas Dudley	Gate Valves	Gate Valves	Gate Valves are used for turning off the water from part of the system, avoiding the need to drain down the entire system in order to carry out maintenance work.	https://www.thomasdudley.co.uk/tyde/category/g
Thomas Dudley	Kinetic	Infrared Urinal Flush Control	The Kinetic® has been designed to optimise the water management of automatic cisterns and multiple station urinal installations. Attractively styled and multi-functional, the Kinetic is an "all-in-one" electronic control, designed to save time and guarantee water-savings in commercial washroom installations.	https://www.thomasdudley.co.uk/tyde/products/kinetic-infrared-urinal-flush-control/
Thomas Dudley	Basin Waste Seal Kit	Basin Waste Sealer	A handy way of sealing your old or new basin waste. Say Goodbye to Leaky Wastes! Installing basin wastes has never been so easy! Our Basin Waste Seal Kit is a handy way of sealing your old or new basin waste. The kit is manufactured from high quality materials and includes a sealing ring, washer and seating – everything you need for a quick and easy installation. There is no need for paint, putty or mastic!	https://www.thomasdudley.co.uk/tyde/products/basin-waste-seal-kit/
Thomas Dudley	Touch Free Taps	Touch Free Taps	Electroflo Taps integrate cutting edge technology and the latest contemporary styling to create a touch-free product that has exceptional levels of quality and styling. They are simple to install and service which saves both time and money on-site.	https://www.thomasdudley.co.uk/tyde/category/taps/
Thomas Dudley	Dual Flush Buttons	Flush Buttons	Dual Flush buttons that allow a water saving dual flush operation provides reduced flush for enhanced water saving	https://www.thomasdudley.co.uk/tyde/category/dual-flush/
Watergate	Water Impact Calculator	Water usage calculator	Use our free Water Impact Calculator (in partnership with Waterwise) to see how much water you use, what it costs, and how small changes can save you money and help the environment.	https://watergate.ai/tools/water-impact-calculator/
Watergate	Watergate	Water management system	Watergate is an advanced AI-powered water management system that helps you save water, save money and protect the planet.	http://watergate.ai
