A WATER-SMART SUMMER

ECO SCAVENGER

HUNT

Name _____

Date _____

Tick off each action as you go. Can you complete the full list?

- Set a 4-minute timer and take a shower – try to finish before it ends.
- Water a plant using rainwater or leftover water (like from a water bottle, washing veggies, or cooking).
- Can you find a garden or park with a water butt? These big barrels collect rain so we can use it to water plants.
- Turn the tap off while brushing your teeth.
- Look up where your tap water comes from – a river, reservoir, or underground?
- Spot a natural water source like a stream, pond, river, or lake.
- Count how many times you turn on a tap today – try to use it fewer times tomorrow.
- Swap a disposable plastic bottle for a reusable one.
- Make a list of 3 water-saving tips and put it on the fridge.
- Check a toilet for leaks using Waterwise's Leaky Loo Challenge.
